
Overview

This manual is a detailed explanation of St. Mary's Regional Medical Center's Laboratory services. It is meant to satisfy the information needs as well as act as a reference source for the medical/dental staff, nursing staff, and other interested parties who are impacted by laboratory operations.

Our goals for this project are to make laboratory policies and procedures understandable and the laboratory-generated information more useful in the delivery of quality patient care.

Input on further improvements from any user of this manual is welcome.

R. Riemersma MD
Medical Director

Sheena Perreault
Director of Laboratory Services
